1. Comment. On 27 September major tank units of the 9th Gds Tank Div probably returned from exercises. The shipments which came from the north and passed through Neubrandenburg on that day indicate the location of the training area. [redacted] a shipment of units of the 31st AAA Div went from Velten to Demmin on 23 September. The units probably returned on the train which, according to the present report, passed through Neustrelitz on 28 September. [redacted] These observations tend to indicate that elements of the 9th Gds Tank Div, reinforced by units of the 31st AAA Div, conducted a tank exercise in the Demmin area between 23 and 26 September. Other information indicated that, at that time, artillery units of the division conducted an exercise in the Wesenberg-Mirow area, and elements of the unidentified Gds Hvy Tank SP Regt apparently held small-scale exercises in the area north of Penzlin. 2. Comment. On 27 September, units of the 36th Pan Bridge Regt of the GSFG possibly departed in order to participate in exercises of the reinforced IX Mtz Rifle Corps. The fact that units of the 19th Gds Mech Div left simultaneously partially confirms the assumption that the division again participated in exercises possibly of the IX Mtz Rifle Corps after 25 September. [redacted] It is possible that elements of the division, along with units of the 207th Mtz Rifle Div, were employed in the exercises as enemy forces in the Burg-Tangermünde Elbe section.
